

Autocase LEED Roadmap

Check out what is upcoming for Autocase LEED features

Phase 1

November 18th, 2021

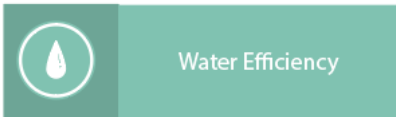

Phase 2

December, 2021

Phase 3

January 2022

Bicycle Facilities + Green Vehicles

Heat Island Reduction + Rainwater Management

Such as:
Expanded Credit Offering
Enhanced Reporting and Documentation
Sundown of Current LEED application

11 Credits across 3 Categories

15 Credits across 5 Categories

15+ Credits across 5 Categories

Phase 1

Launching the new Autocase LEED interface on November 18! Check it out today! Includes new results features, ease of inputting, and credit by credit analysis.

Phase 2

Credits will be added to the software gradually through the remainder of the year, including new transportation and sites credits. Keep an eye out for updates!

Phase 3

Further credit offerings will be investigated and included on an ongoing basis, with several additions planned. Refinements and alterations to our report formats and offering will be made based on your feedback. With the new Autocase LEED functionality, the older user interface and some of the methods will no longer be necessary, and existing users will receive a notification of that change soon.

Future Phases

Our team is committed to continuing to improve Autocase's LEED functionality. If you have requests, contact our product team directly at am@autocase.com, as we would love to hear your feedback and feature requests!
